

EXPERIENCE MAKES THE DIFFERENCE!

RELIABLE QUALITY WITH EVERY PART!

Press bed areas up to 70" x 170" & Deep draws up to 9.0" deep.

Custom stampings designed to meet every application.

Our presses produce products ranging from Carbon, Stainless, HSLA Steels, to all non-Ferrous & Titanium.

THE STAMPING EXPERTS

When it comes to quality stampings, Ross Design and Engineering is proud to be an industry leader. Our highly skilled craftsmen undergo continual training, and every stage of the process is subjected to our rigorous quality control process. The result? Top quality stampings compliant with ISO performance standards.

Our in-house tool room (tool & die makers) reduces downtime and speeds delivery. With presses reaching capacities from 30-750 tons, and up to a 14 ga. - 9.00" deep draw, to 7 ga. x 6.0" deep HSLA, we can offer maximum flexibility and versatility. For spare parts, brackets, forks, reservoirs and caster components, count on Ross for reliable, high quality manufactured stampings.

We design, build and maintain all of the tooling your products will require. This gives us maximum adaptability to suit our customers' needs!

MACHINING PRECISION

When it comes to machining complex components or finished parts, when exacting tolerances require highly skilled precision, Ross has you covered.

Ross utilizes cell technology and employee empowerment to make sure every part that is produced is to exacting standards. Ross maintains a variety of CNC mills, lathes and large bed capacity mills. Ross will make sure your component or assembly is done right the first time to the exacting standards that your company requires.

Ross is vertically integrated from:

- Sheet/Plate/Bar - Processing
- Blanking - Forming - Drawing
- Turning - Milling - Drilling
- Mig - Tig - Resistance Welding
- Assembly - Testing - Verifying
- Raw to completed products

We offer a wide range of equipment and capabilities to meet our customers' needs.

Our stringent quality control and process control ensures precise results every time.

For machining results that go above and beyond, count on Ross!

QUALITY WITH EXCEPTIONAL RESULTS!

Our skilled welders can handle it all—small precise welds to assembly line cell welding, including Tig and Mig welding.

Our measuring technology ensures exact measurements in difficult components and assemblies.

RELIABLE EXCELLENCE

Our cross-department Quality Management System, modeled after the exacting standards of the automotive industry, is driven by an employee team committed to being the best.

We hold daily meetings with all personnel at the beginning and end of each shift .

Testing.
Cleaning.
Painting.

At Ross Design and Engineering, we understand the importance of doing the job right and at the right price. We continually emphasize communication and education, and strive to make our employee team the best. We invite you to tour our facility and see the Ross commitment to quality at work.
